

## 10<sup>th</sup> Anniversary Photo Recap

Summer 2017

When I moved to the Dominican Republic 10 years ago, I didn't know how long I would be here, and I still don't know. Throughout these 10 years, the ministry has morphed from primarily treating patients needing physical therapy, to primarily teaching Dominican physical therapy students, which certainly has a greater impact on how Dominicans are treating their patients. God has been very active throughout these years here, preparing me all along through relationships established and experience gained for each phase of the ministry. In addition to the physical therapy aspect of the ministry, God has been using me in my congregation and community in different service roles.
